What's happening with BCPS one

What is BCPS One?

BCPS One is designed for parents to access information about their child's classes, progress and curriculum in one place.

Who uses BCPS One?

BCPS parents, students, and staff all have access to BCPS One. To access BCPS One, you must first create a myBCPS account by visiting https://mybcps.bcps.org and adding your student(s). You will need a parent verification code to complete this process, which will be distributed by schools at the beginning of the school year. Please visit https://bcpsone.bcps.org/support/ for additional BCPS One support.

When can you begin using BCPS One?

As soon as you have created a myBCPS account and added a student, you have anytime, anywhere access to your student's class schedules, assignments, and grade information.

Why should you create an account?

BCPS One offers 24/7 access to your student's information and provides opportunities for maintaining ongoing conversations with your student's teachers throughout each school year.

Where can you learn more?
